Chairman's Statement

Overview

Economic conditions in Asia remained stable in the first half of 2004 and Dairy Farm performed well producing good growth in underlying profit. The Group is also benefiting from acquisitions made in recent years.

Performance

Sales for the first half of 2004, including associates, increased 16% to US\$2.5 billion. Underlying net profit for the period increased by 40% to US\$62 million. Net profit was US\$85 million, which included an exceptional gain of US\$23 million arising from asset disposals. Underlying earnings per share, enhanced by share repurchases in 2003, rose 48% to US\$4.67.

The Board has declared an interim dividend of US\$2.10 per share, compared with US\$1.40 last year, payable on 20th October 2004.

Operations

Our North Asia operations achieved further significant profit growth as the Hong Kong businesses benefited from an improving economy and continued productivity enhancements. Mannings remains one of our best performing businesses and there was a gradual improvement at Wellcome. 7-Eleven, which was adversely affected last year by SARS, rebounded strongly, but Maxim's, our restaurant associate, is taking longer to recover.

IKEA performed well in Hong Kong and Taiwan with improvements in both sales and profit. In the second half, two new IKEA stores will be opened and another enlarged. Wellcome Taiwan experienced difficult market conditions, but was able to consolidate the benefits from its past acquisitions and purchased another seven stores in February. Development also continued in Southern China where 7-Eleven ended the half-year with 168 stores; and Mannings plans to open its first store in Guangzhou in the fourth quarter. In South Korea, our 50% associate Olive Young continued its expansion.

The Group's Southeast Asian operations again performed strongly. The benefits arising from the acquisition of Tops in Malaysia and Shop N Save in Singapore have enhanced the improving trend in those countries. Seven Giant hypermarkets, the Group's main growth vehicle in the region, were opened in the first six months in Malaysia and Indonesia, building on an already strong market position. A further 23 Guardian health and beauty stores were added in Singapore, Malaysia and Indonesia, as this profitable format was rolled out. Results in the Indonesian supermarkets, however, have yet to come through, and the performance in India has been disappointing.

Asset Disposals

During the period an ice manufacturing and cold store operation and two retail properties in Hong Kong were sold. Agreement was also reached for the sale of a warehouse in Hong Kong, which completed in July. Gross proceeds of US\$104 million were received from these disposals producing an exceptional gain of US\$84 million, of which US\$61 million will be recognized in the second half.

Outlook

The outlook remains broadly positive for the second half of 2004 as Dairy Farm continues to focus on strengthening its leading retail positions in Asia.

1. ACCOUNTING POLICIES AND BASIS OF PREPARATION

The unaudited interim condensed financial statements have been prepared in accordance with IAS 34 – Interim Financial Reporting.

In 2004, the Group early adopted the following International Financial Reporting Standards ('IFRS'):

IFRS 2	Share-based Payment
IFRS 3	Business Combinations
IFRS 4	Insurance Contracts
IFRS 5	Non-current Assets Held for Sale and Discontinued Operations
IAS 36 (revised 2004)	Impairment of Assets
IAS 38 (revised 2004)	Intangible Assets
IAS 39 (amended 2004)	Financial Instruments: Recognition and Measurement

The early adoption of IFRS 2 has resulted in a change in the accounting policy for share-based payments. Until 31st December 2003, the provision of share options to employees did not result in a charge in the profit and loss account. Subsequent to that date, the Group charges the cost of share options to the profit and loss account. The adoption of IFRS 2 resulted in:

	Six months ended 30th June	
	2004 US\$m	2003 US\$m
Accumulated effect on 1st January		
– increase in share premium	0.2	–
– decrease in revenue and other reserves	(0.2)	–
Current period		
– increase in administration expenses	0.1	0.1

The early adoption of IFRS 3, IAS 36 (revised 2004) and IAS 38 (revised 2004) resulted in a change in the accounting policy for goodwill. Until 31st December 2003, goodwill was amortized on a straight line basis over a period ranging from 5 to 20 years and assessed for an indication of impairment at each balance sheet date. In accordance with the provisions of IFRS 3, the Group ceased amortization of goodwill from 1st January 2004. Accumulated amortization as at 31st December 2003 has been eliminated with a corresponding decrease in the cost of goodwill. From the year ending 31st December 2004 onwards, goodwill is tested annually for impairment, and when there are indications of impairment.

The early adoption of IFRS 5 has resulted in a change in the accounting policy for non-current assets (or disposal groups) held for sale. The non-current assets (or disposal groups) held for sale were previously neither classified nor presented as current assets or liabilities. The application of IFRS 5 does not affect the prior period financial statements.

Other than described above, there have been no changes to the accounting policies described in the 2003 annual financial statements.

The Group's reportable segments are set out in note 2.
